## Personal Profile

A pragmatic developer with theoretical knowledge of computer science, practical coding experience in multiple languages and platforms, and an individual who not only enjoys but is also seriously committed to learning new things. My degree has revealed a strong personal interest in engineering and solving complex problems using the latest tech such as C# and Java. I am out on the hunt looking for an opportunity to learn, grow, develop, and achieve excellence in all projects I get involved in. Currently a taxi driver due to the pandemic as I couldn't secure a graduate job after graduation. With the pandemic over, looking to go into a professional job.

## Education

BSc Computer Science– Manchester Metropolitan University First Class Honours Degree	2017 – 2020
Functional Skills English – Learn for Life Enterprise Sheffield Pass	2016
Level 3 BTEC Diploma in ICT – Doncaster College D*D	2015 – 2017
GCSEs – Hall Cross Academy 5 A*- C	2014 – 2015

## Projects

Working with my brother on a social media platform which he has created. Trying to understand the source code and looking for ways to improve the application and add new features to it. Hikmasight.com

University Year 3: As part of the final year project, I created a student workload planning tool app which allows students to manage their assignments by storing their coursework data.

University Year 2: Part of a group of five who were assigned with creating a point of sale software for a client which can complete transactions either by manual input or automatic identification i.e. barcode scanning. Personally, responsible for the coding aspect of the project and overall, it turned out to be highly successful and was awarded 80% for the project.
